EXPLOSIVE PERFORMANCE

With 700PS, this 5.2-litre V12 twin turbo engine makes the new V12 Vantage the most powerful Vantage ever. 0-62mph in just 3.5sec, a top-speed of 200mph, this V12 Vantage marks the spectacular finale for an iconic bloodline with unmatched performance and dynamics.

AERODYNAMICALLY HONED

In the pursuit of potent performance, V12 Vantage has been aerodynamically optimised from end to end, teasing, forcing, and manipulating the airflow to ensure optimum cooling for the engine, transmission and brakes, as well as generating significant downforce. The full width front splitter and extended sills channel air under the body, while the reshaped diffuser and rear wing work together to contribute to produce 204kg of downforce at 200mph, enhancing grip and stability at speed.

BRAKING FORCE

Slowing a sports car with the potency of V12 Vantage is entrusted to Carbon Ceramic Brakes, for stopping power that's matched to the V12's performance, those at the front measuring 410mm across and clamped by six piston calipers. These brakes ensure optimal retardation even in extended and extreme use, but also save a crucial 23kg of unsprung mass compared to a conventional iron brake arrangement.

INTERIOR MADE FOR PRECISION AND CONTROL

The best seat in the house

The position as the ultimate V12

Vantage is signified on the interior by the Sports Plus seats with full semi-aniline leather which are featured as standard. For even further weight saving there is the option of an all-new carbon fibre performance seat, saving an additional 7.3kg.

A DRIVER FOCUSED INTERIOR

In a driver focused sports car required a driver focused cockpit. An environment where luxury meets the challenge of the open road ahead. Clear dials, intuitively placed controls and superb all-round visibility means the drive is undistracted, focused and precise, leaving the driver to concentrate on what matters most: the thrill of commanding a V12 Vantage.

INFINITE DETAIL

Even in the luggage area, the sporting prowess of V12 Vantage is immediately visible. The traditional parcel shelf has been omitted to instead provide a clear view of the strut brace that spans the rear suspension towers, stiffening the structure, enhancing the drive. A level of focus which embodies everything that V12 Vantage is truly about.
